

## **SUSTAINABILITY, SOCIAL IMPACT & BEAUTY OF BALANCE**

**Levanto, November 2018** – La Sosta di Ottone III joins the many companies that have embraced the battle for **renewable sources promoted by LifeGate Energy**.

From today, **the company network is powered exclusively by sustainable electricity**: 100% from renewable sources (sun, wind and water), 100% Italian and certified, with residual CO2 emissions offset by the Impatto Zero® project.

**La Sosta di Ottone III's electricity consumption, therefore, is no longer a burden on the environment.**

With LifeGate, La Sosta di Ottone III has an active role as an agent of change in the most **important environmental challenge of our time**: the energy transition from fossil fuels to renewables. In 2016, 81% of all energy produced in the world came from fossil fuels, the main factors responsible for climate change. Over the next 25 years, the world's energy needs will grow by around 30%: to reduce the emissions of greenhouse gases, **it is essential that the share of energy from renewable sources increases more and more**. But the decarbonisation process can only take place if everyone – private individuals, companies and institutions – play their part.

La Sosta di Ottone III's decision is a simple gesture, but able to produce immediate changes, which will become more significant as others join this battle, giving substance to a widespread and **growing environmental sensitivity**.
